	/Dohm Chankong/ Primary Examiner, Art U	Init 2452

Continuation of 11. does NOT place the application in condition for allowance because: The rejections of the previous final rejection are maintained. For a detailed explanation of the application of the cited prior art, see the office action mailed on 03/18/2009. The examiner maintains his interpretation of the term "altering the representation the folder tree structure... with the altered representation of the folder tree structure. The phrase "altering the representation or altered representation" are too broad unless subject matter is included in the claim as argued on page 4 or currently filed remarks. It is noted that the core cocept of document registration and storage in specific location at the server are disclosed and within the scope of the combination of cited references e.g. Dillingham discloses a technique to manage files and folder upon client initiation on the remote server (abstract) whereas, Berchtold, Archiving and retrieving and classifying documents into meaningful collections is accomplished in a manner similar to sending email to recipients, retrieving messages from folders, and classifying messages into folder hierarchies (abstract) and Miyamura discloses, a file generation apparatus has file generating and registering means for generating a file and registering the file in a file posting apparatus, URL generating means for generating URL notation that includes a description of full path information to the file registered in the file posting apparatus and a description to call a function which operates the file (abstract) and therefore, sending, receiving, transmitting etc are merely rpresents a step which can be rearrange specific to a design choice. Applicant is invited to bring the specific feature of the invention into the independent claim language as argued in the remarks on page.4. The claim limitation "altering the representation of the folder tree structure" is disclosed in Miyamura, abstract where generating URL notation that includes a description of full path information to th
